### Proprietary Certificate

To Whom it may Concern:

"Teleflex Medical", having office at IDA Business and Technology Park, Dublin Road, Athlone, Ireland hereby confirms and verifies that following:

1. "Teleflex Medical" owns all the rights title and interest in the patents, trademarks, trade names, inventions, copyrights, know how, trade secrets and any other intellectual property of LMA Fastrach™, the original LMA invented and designed by Dr. Archie Brain, which fall under Supraglottic Airway Device category to help in all areas of oral anaesthesia and providing ventilation requiring respiration. The following are the details of the /product:
  - Designed for the anticipated or unanticipated difficult airway situation and for cardiopulmonary resuscitation, facilitates continuous ventilation between intubation attempts resulting no tissue distortion.
  - The rigid handle of the device facilitates one-handed insertion, removal and adjustment to enhance oxygenation and alignment with the glottis and can be introduced blindly with one hand from any position.
  - Construction features a rigid airway tube wherein curvature in a single plane establishes an accurate path of angular extent in the preferred range of 130 degree, plus or minus 5 degree, which is in substantial anatomical conformance with adult human's airway path, requiring an inter-dental gap of only 20mm.
  - An internal ramp formation within the mask structure assures a limited but important measure of further and stabilized guidance of an ET, oriented to target safe entry of the ET into the glottis opening containing glottis aperture.
