Annexure-I

- Neo-Help should be a polyethylene occlusive suit to prevent hypothermia of new-born's.
- Should be sterile suit in which the baby is placed immediately after birth without drying (before being admitted to the ICU).
- Protect from Heat loss due to environmental factors (evaporation, convection, conduction and radiation) is limited.
- Should be double layer of polyethylene (external layer: 50 microns, internal layer: 30 microns) which can protect from drafts.
- The heat loss through radiation, convection and evaporation is limited.
- Hood should limit the dispersion of heat by the head.
- Adjustable to the infant's head, it does not let the air in
- Should be pre-formed foam which helps to keep the baby's airway open and provides a barrier against heat loss by conduction, while maintaining his position and offering comfort to the baby.
- Neo-HELP should be an ingenious pouch completely transparent, to monitor the colour of the New-born's skin and breath movements, and easy to use with direct access to the baby through the open/closed central opening.
- Neo-HELP should be suitable for delivery room, place of resuscitation, emergency, operating room, transport and all users.
- Product should be recommended not to use for more than 24 hours.
- Neo-Help should be in accordance with established clinical protocol.
