### SOLE SOURCE CERTIFICATE

To Whom It May Concern:

Turnitin®, including its associated components, is a single-source product developed and sold by Turnitin, LLC, based in Oakland, CA. Our product is a unique service that is not offered by any other vendor or reseller in a similar format. The product may be procured only from Turnitin, LLC, at the address listed below. Turnitin is an item for which competition is precluded due to patent (SYSTEMS AND METHODS FOR FACILITATING ORIGINALITY ANALYSIS - USPTO 8,296,661).

The Turnitin service provides a plagiarism-prevention tool that allows academic institutions to easily determine if students are writing and submitting original work. Utilizing our unique technology, Turnitin searches the Internet, as well as our proprietary databases of papers and digital texts for sources of potential plagiarism. The service then generates a custom Originality Report that highlights and provides links to any textual matches found on the Internet, in our database of previously submitted papers, and/or in the proprietary databases of subscription-based publication material from content aggregators with whom we have partnered.

To find potential plagiarism, Turnitin has developed its own search technology (in use for over 15 years). Turnitin's proprietary crawler, called Walker, is different than many other solutions that rely on search engines such as Yahoo or Bing's Search API but cannot scale because of cost or request limitations. Walker has been built from the start to be horizontally scalable, smart about recrawling, lean on storage, and flexible about what can be done with data. Some of the key features you can expect from Walker:

- Broad, scalable, focused crawl of the web.
- Prioritized (re)crawl, and how often.
- Persistent, query-friendly store of the crawl frontier allowing for useful, rapid reporting.
- Smart crawling that will avoid junk (ex. crawler traps).
- Crawling non-HTML file types.
- Support for selectively crawling JavaScript based sites.
