4	Coltene Canal Pro by Coltene The CanalPro Apex Locator offers a 3D user interface based on a high resolution TFT color graphic display. It shows the movement of the file inside the canal from the beginning of the measurements to the end, providing uninterrupted feedback to the dentist. Accuracy of measurement-The two measuring frequencies are alternated and not mixed, as it is done in conventional apex locators, thus canceling the need for signal filtering and eliminating the noise caused by nonideal filters. To calculate the file tip position, the RMS (Root Mean Square) level of the signal (signal intensity) is used and not signal amplitude or phase. This makes the measurement much more immune to various kinds of electromagnetic noises. Virtual Apex Function-Virtual apex enables to mark a predetermined position at the required distance from the apex. When this feature is enabled, the dentist gets clear visual and audio indication that the file tip has reached the selected position near the apex. Warranty - 2 Years (Lifetime Warranty on Battery)	1
